Download SQL Server Management Studio (SSMS) 20.2

SSMS 20.2 is the latest generally available (GA) version. If you have a *preview* version of SSMS 20 installed, uninstall it before installing SSMS 20.2. Installing SSMS 20.2 doesn't upgrade or replace SSMS 19.x and earlier versions.

- Release number: 20.2
- Build number: 20.2.30.0
- Release date: July 9, 2024

By using SQL Server Management Studio, you agree to its [license terms](#) and [privacy statement](#). If you have comments or suggestions or want to report issues, the best way to contact the SSMS team is at the [SSMS Developer Community](#) site.

The SSMS 20.x installation doesn't upgrade or replace SSMS 19.x and earlier versions. SSMS 20.x installs alongside previous versions, so both versions are available. However, if you have an earlier *preview* version of SSMS 20 installed, you must uninstall it before installing the latest release of SSMS 20. You can see if you have a preview version by going to the Help > About window.

If a computer contains side-by-side installations of SSMS, verify you start the correct version for your specific needs. The latest version is labeled **Microsoft SQL Server Management Studio v20.2**.

Important

For SQL Server Management Studio (SSMS) 18.7 through 19.3, Azure Data Studio is automatically installed alongside SSMS. Users of SQL Server Management Studio are able to benefit from the innovations and features in Azure Data Studio. Azure Data Studio is a cross-platform and open-source desktop tool for your environments, whether in the cloud, on-premises, or hybrid.
